

Omar Mohamed Rifat

Planning & Cost Control Engineer

✉ omarrifat12@gmail.com ☎ 0590287063 📍 Al Olaya, Riyadh, Saudi Arabia

PROFILE

Delivery-focused Civil Engineer with 3 years of hands-on experience in site execution and on-site supervision across building projects. Strong in subcontractor coordination, daily site follow-up, inspections, snagging, and progress reporting, with consistent focus on quality, safety (HSE), and schedule. Proven ability to coordinate with contractors, consultants, and suppliers to resolve site issues quickly and support on-time delivery.

PROFESSIONAL EXPERIENCE

Civil Engineer, FGCC

06/2025 – Present

- Supervise on-site construction activities to ensure compliance with project specifications, HSE standards, and quality requirements.
- Conduct regular site inspections to monitor progress, identify issues, and coordinate with contractors and consultants for timely resolution.
- Prepare daily/weekly site reports, verify material quality, and ensure execution follows approved drawings and project schedules.
- Prepare Bar Bending Schedules (BBS) from structural drawings to calculate reinforcement quantities and support site execution.
- Work hands-on with DOKA and PERI formwork and scaffolding systems, overseeing installation, alignment, stripping, and coordination to ensure safe and efficient concrete works.

Diriyah Project, Riyadh,
Saudi Arabia

Civil Engineer, ABV Rock Group

04/2025 – 05/2025

- Supported site inspections and progress reporting for structural works to ensure alignment with drawings, specifications, and safety requirements.
- Assisted with project execution follow-up and contractor coordination to maintain schedule and resolve site issues efficiently.

Riyadh, KSA

Civil Engineer, Al-Bostany Construction

12/2024 – 03/2025

- Supervised on-site operations to ensure compliance with approved drawings, project specifications, and HSE regulations.
- Assisted with BOQ preparation, quantity takeoff, and schedule updates (weekly look-ahead and progress tracking).
- Supported material procurement planning by preparing material requests, verifying quantities, and coordinating deliveries to site.
- Coordinated subcontractors, suppliers, and site teams to maintain workflow continuity and meet project milestones.

New Cairo, Egypt

EDUCATION

B.Sc. in Civil Engineering, Canadian International College(CIC)

2018 – 2023

SKILLS

Software & Tools

- AutoCAD
- Revit
- SAFE
- Primavera P6
- MS Excel
- MS Word
- PowerPoint

Quantity Surveying

- BOQ Preparation
- Quantity Takeoff
- Measurement Sheets

Cost & Reporting

- Cost Tracking (Excel)
- Technical Documentation
- Presentations

Planning & Control

- Scheduling
- Time Control
- Progress Tracking (Primavera P6)

PROJECTS

Project Management Plan for High-Speed Railway Station,

09/2018 – 06/2023

Graduation Project (Project Management) | Grade: A

- Integrated Project Controls Plan for a High-Speed Railway Station (October Gardens, Fayoum Road)
- Developed a complete project management plan covering scope definition, WBS, and construction sequencing.
- Produced detailed time and cost estimates, BOQ calculations, and quantity-based budget planning.
- Built a full baseline schedule in Primavera P6, including activities, logic ties, milestones, and resource/time loading.
- Performed risk identification and analysis, with mitigation actions and contingency planning to protect schedule and budget.
- Conducted contract and claims analysis, supporting procurement strategy and contract administration decisions.
- Applied time and cost control techniques (earned value / progress measurement) to track performance and recommend corrective actions.

Courses

CCW-Cost Control Workshop, HA MANAGEMENT

03/2026 – 04/2026

Cost Control Workshop (CCW) – 30 Hours

PCW-Planning And Controlling Workshop, HA MANAGEMENT

02/2026 – 03/2026

Planning & Controlling Workshop (PCW) – 30 Hours
